

Safety policy

The safety policy applies to all activities of IDEAL FLOORCOVERINGS and is integrated in all strategic decisions.

The safety and health of our employees, of third parties who work for or with us and of our visitors is our highest priority, in all circumstances.

No matter how urgent, important or difficult the work is, there is always time, or there are always means or measures available to do this work in a safe and healthy way. IDEAL FLOORCOVERINGS is convinced that safe, respectful and healthy work is good for our employees, their families, our community, our customers and the company.

To this end, the management and supervisors, the prevention advisor and the CPPW commit themselves (each within their responsibilities) to:

- meeting welfare legislation and other related requirements as minimum requirements, striving for better performance where possible.
- to stimulate well-being awareness among its employees by making this known, by projecting it and by involving the employees as much as possible in this.
- to encourage and reward safe and respectful behavior, to correct or sanction inappropriate behavior in accordance with the work regulations.
- providing resources, training, procedures and instructions and ensuring that resources, procedures and instructions are usable, known and applied.
- actively seek to improve safety, health and well-being in processes, working methods and working conditions.
- all accidents and incidents related to report, investigate, take action and communicate safety, well-being and undesirable behavior to prevent recurrence.
- informing (sub)contractors, transporters and visitors about possible risks and their obligations to act in accordance with the instructions and procedures laid down by IDEAL FLOORCOVERINGS.

Our safety policy is based on the principle of dynamic risk management. All possible risks are analysed continuously and systematically at every level of the organisation, process and sub-process, and these are controlled by taking preventive measures, taking into account the prevention hierarchy.

The daily care and cooperation of the management and all employees will lead to the realization of this welfare policy.
